REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: No prior art has been found or presented which teaches the production of a polymer blend of two ethylene/alpha-olefin copolymers wherein "the ethylene content of the first component differs by at least 10 weight percent from the ethylene content of the second component", as herein recited and claimed. Since there are no other issues with regard to the clarity or enablement of the claims, these claims are deemed to contain allowable subject matter.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

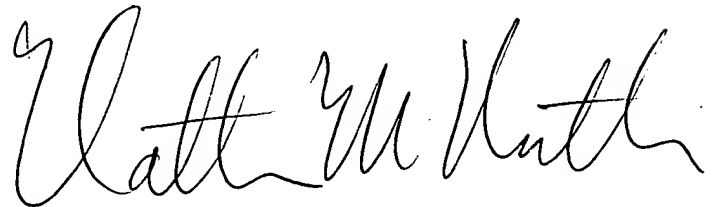

The reference to Datta et al, cited of interest, teaches the production of a polymer blend which may comprise two ethylene/alpha-olefin copolymers, as herein claimed. However, the reference fails to recognize the concept of the minimum difference in the ethylene contents of the two composing copolymers. Note the Abstract and column 3 (lines 57 et seq.). The reference is not deemed to be a bar to the patentability of the claims. A copy of this patent is not being furnished with this Office Action.
